

## Resolution to Raise North Dakota's Tobacco Tax

Whereas, according to the 2014 US Surgeon General's Report, increasing tobacco excise taxes have proven highly effective in preventing initiation among youth, reducing tobacco use by promoting cessation among current users, discouraging relapse among former users, and reducing consumption among those who continue to use tobacco;

Whereas, tobacco use remains North Dakota's leading preventable cause of death, killing more people than alcohol, AIDS, car crashes, illegal drugs, murders, and suicides combined;

Whereas, 19.4% (7,400) of youth in North Dakota smoke, and 600 North Dakota children (under 18) become new daily smokers each year, of whom more than 14,000 will die prematurely because of this addiction;

Whereas, 21.2% (115,500) of adults in North Dakota smoke and nearly 800 North Dakotans will die each year from smoking and smoking-related disease;

Whereas, tobacco use in North Dakota imposes economic burden, with smoking-caused direct-healthcare costs amounting to \$326 million each year, smoking-caused productivity losses approximating \$192 million annually, and each household paying \$586 per year in state and federal taxes from smoking-caused government expenditures;

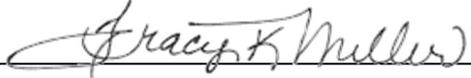

Whereas, each year, the North Dakota government Medicaid payments directly related to tobacco use are \$47 million;

Whereas, the current cigarette tax of \$0.44 per pack, pipe tobacco and cigar tax at 28% of the wholesale purchase price, and snuff tax at \$0.60 per ounce, places North Dakota 46<sup>th</sup> among the states and U.S. territories for tobacco tax rates, and is lower than the average of tobacco growing states; and

Whereas, in every single state that has significantly raised its cigarette tax rate, pack sales have gone down sharply and smoking rates were reduced; and

Whereas, the legislative body in North Dakota has not enacted legislation to increase our state's tobacco taxes since 1993;

**Now therefore be it resolved, The North Dakota Public Health Association supports increasing the tobacco tax in North Dakota** as a proven way to prevent youth tobacco initiation, encourage a reduction of adult tobacco use, reduce health care costs, and provide an overall benefit to public health. Further, the North Dakota Public Health Association endorses legislative action to be taken during the 64<sup>th</sup> Legislative Assembly to significantly raise North Dakota's cigarette tax to a minimum of \$2.00 per pack and all other tobacco products by a proportional amount.

Signed:  Date: 9-23-2014

This resolution was adapted from the Raise it for Health resolution.
